JGV DIRECT

Properties of H7N7 influenza A virus strain SC35M lacking interferon antagonist NS1 in mice and chickens

G. Kochs, I. Koerner, L. Thiel, S. Kothlow, B. Kaspers, N. Ruggli, A. Summerfield, J. Pavlovic, J. Stech and P. Staeheli

1403–1409

ANIMAL

DNA viruses

In vivo fitness and virulence of a drug-resistant herpes simplex virus 1 mutant

J. M. Pesola and D. M. Coen

1410–1414

Human herpesvirus 7 infection increases the expression levels of CD46 and CD59 in target cells

M. Takemoto, K. Yamanishi and Y. Mori

1415–1422

Reciprocal roles of cellular chemokine receptors and human herpesvirus 7-encoded chemokine receptors, U12 and U51

K. Tadagaki, K. Yamanishi and Y. Mori

1423–1428

Processing and MHC class I presentation of human cytomegalovirus pp65-derived peptides persist despite gpUS2–11-mediated immune evasion

K. Besold, N. Frankenberger, S. Pepperl-Klindworth, J. Kuball, M. Theobald, G. Hahn and B. Plachter

1429–1439

Upregulation of CD94/NKG2A receptors and Qa-1^b ligand during murine cytomegalovirus infection of salivary glands

V. J. Cavanaugh, D. H. Raulet and A. E. Campbell

1440–1445

Murine gammaherpesvirus 68 ORF20 induces cell-cycle arrest in G₂ by inhibiting the Cdc2–cyclin B complex

R. Nascimento and R. M. E. Parkhouse

1446–1453

Silencing of latent membrane protein 2B reduces susceptibility to activation of lytic Epstein–Barr virus in Burkitt's lymphoma Akata cells

M. P. Rechsteiner, C. Berger, M. Weber, J. A. Sigrist, D. Nadal and M. Bernasconi

1454–1459

Optimization of human papillomavirus type 16 (HPV-16) L1 expression in plants: comparison of the suitability of different HPV-16 L1 gene variants and different cell-compartment localization

J. Maclean, M. Koekemoer, A. J. Olivier, D. Stewart, I. I. Hitzeroth, T. Rademacher, R. Fischer, A.-L. Williamson and E. P. Rybicki

1460–1469

Front cover illustration

Structure of the HPV-16 L1_(20–474) monomer (top) and side view of the structure of the HPV-16 L1 pentamer (bottom). The FG loop is coloured in orange, the HI loop in green, the DE loop in magenta, the EF loop in red and the BC loop in yellow. The graphic was created by using RasMol software. Image courtesy Professor Joakim Dillner, Department of Medical Microbiology, Malmö University Hospital, Lund University, Malmö, Sweden. See the paper by Ryding *et al.* in the March issue of the journal, pp. 792–802.

Identification of HLA-DR1- and HLA-DR15-restricted human papillomavirus type 16 (HPV16) and HPV18 E6 epitopes recognized by CD4 ⁺ T cells from healthy young women K. M. E. Gallagher and S. Man	1470–1478
Characterization of two novel cutaneous human papillomaviruses, HPV93 and HPV96 N. Vasiljević, K. Hazard, L. Eliasson, H. Ly, A. Hunziker, E.-M. de Villiers, B. Norrild, J. Dillner and O. Forslund	1479–1483
Complete genomic characterization of a murine papillomavirus isolated from papillomatous lesions of a European harvest mouse (<i>Micromys minutus</i>) K. Van Doorslaer, A. Rector, A. Bennett Jenson, J. P. Sundberg, M. Van Ranst and S.-J. Ghim	1484–1488
Betapapillomaviruses frequently persist in the skin of healthy individuals M. N. C. de Koning, L. Struijk, J. N. B. Bavinck, B. Kleter, J. ter Schegget, W. G. V. Quint and M. C. W. Feltkamp	1489–1495
Identification and functional analysis of the origins of DNA replication in the <i>Cydia pomonella</i> granulovirus genome S. Hilton and D. Winstanley	1496–1504
RNA viruses	
Complete genomes for hepatitis C virus subtypes 6f, 6i, 6j and 6m: viral genetic diversity among Thai blood donors and infected spouses L. Lu, C. Li, Y. Fu, L. Thaikruea, S. Thongswat, N. Maneekarn, C. Apichartpiyakul, H. Hotta, H. Okamoto, D. Netski, O. G. Pybus, D. Murphy, C. H. Hagedorn and K. E. Nelson	1505–1518
Complete genomes of hepatitis C virus (HCV) subtypes 6c, 6l, 6o, 6p and 6q: completion of a full panel of genomes for HCV genotype 6 L. Lu, C. Li, Y. Fu, F. Gao, O. G. Pybus, K. Abe, H. Okamoto, C. H. Hagedorn and D. Murphy	1519–1525
Genetic diversity in hepatitis C virus in Egypt and possible association with hepatocellular carcinoma M. Abdel-Hamid, M. El-Daly, V. Molnegren, S. El-Kafrawy, S. Abdel-Latif, G. Esmat, G. T. Strickland, C. Loffredo, J. Albert and A. Widell	1526–1531
Egg whites from eggs of chickens infected experimentally with avian hepatitis E virus contain infectious virus, but evidence of complete vertical transmission is lacking H. Guo, E. M. Zhou, Z. F. Sun and X.-J. Meng	1532–1537
Analysis of the complete genomic sequence of an apparently avirulent strain of avian hepatitis E virus (avian HEV) identified major genetic differences compared with the prototype pathogenic strain of avian HEV P. Billam, Z. F. Sun and X.-J. Meng	1538–1544
Genetic determinants of Sindbis virus strain TR339 affecting midgut infection in the mosquito <i>Aedes aegypti</i> D. J. Pierro, E. L. Powers and K. E. Olson	1545–1554
Further characterization of a paramyxovirus transcription initiation signal: search for required nucleotides upstream and importance of the N phase context S. Cordey and L. Roux	1555–1564
A novel monolayer cell line derived from human umbilical cord blood cells shows high sensitivity to measles virus F. Kobune, Y. Ami, M. Katayama, M. Takahashi, R. Tuul, G. Korukluoglu, T. Kiyohara, R. Miura, H. Sato, M. Yoneda and C. Kai	1565–1567
Analysis of gene expression in Lassa virus-infected HuH-7 cells S. Müller, R. Geffers and S. Günther	1568–1575

Induction of apoptosis in <i>Saccharomyces cerevisiae</i> results in the spontaneous maturation of tetravirus procapsids <i>in vivo</i> M. Tomasicchio, P. A. Venter, K. H. J. Gordon, T. N. Hanzlik and R. A. Dorrington	1576–1582
Identification of minimal sequences of the <i>Rhopalosiphum padi</i> virus 5' untranslated region required for internal initiation of protein synthesis in mammalian, plant and insect translation systems E. Gropelli, G. J. Belsham and L. O. Roberts	1583–1588
Vaccination with a T-cell-priming Gag peptide of caprine arthritis encephalitis virus enhances virus replication transiently <i>in vivo</i> C. Nenci, M.-L. Zahno, H.-R. Vogt, G. Obexer-Ruff, M. G. Doherr, R. Zanoni, E. Peterhans and G. Bertoni	1589–1593

PLANT

Molecular dissection of the potato virus Y VPg virulence factor reveals complex adaptations to the <i>pvr2</i> resistance allelic series in pepper V. Ayme, J. Petit-Pierre, S. Souche, A. Palloix and B. Moury	1594–1601
<i>In vitro</i> association between the helper component–proteinase of zucchini yellow mosaic virus and cuticle proteins of <i>Myzus persicae</i> A. Dombrovsky, N. Gollop, S. Chen, N. Chejanovsky and B. Raccach	1602–1610
RNA4-encoded p31 of beet necrotic yellow vein virus is involved in efficient vector transmission, symptom severity and silencing suppression in roots M. D. Rahim, I. B. Andika, C. Han, H. Kondo and T. Tamada	1611–1619
A novel cleavage site within the potato leafroll virus P1 polyprotein X. Li, C. Halpin and M. D. Ryan	1620–1623
Infectivity, pseudorecombination and mutagenesis of Kenyan cassava mosaic begomoviruses S. E. Bull, R. W. Briddon, W. S. Sserubombwe, K. Ngugi, P. G. Markham and J. Stanley	1624–1633
<i>Cymbidium</i> ringspot virus defective interfering RNA replication in yeast cells occurs on endoplasmic reticulum-derived membranes in the absence of peroxisomes L. Rubino, B. Navarro and M. Russo	1634–1642
