

Author Index for this issue

(v)–(vi)

JGV DIRECT

Experimental infection of sheep with visna/maedi virus via the conjunctival space

H. Niesalla, T. N. McNeilly, M. Ross, S. M. Rhind and G. D. Harkiss

1329–1337

ANIMAL DNA

Premature expression of the latency-related RNA encoded by bovine herpesvirus type 1 correlates with higher levels of beta interferon RNA expression in productively infected cells

S. Perez, F. Meyer, K. Saira, A. Doster and C. Jones

1338–1345

Deletion or green fluorescent protein tagging of the pUL35 capsid component of pseudorabies virus impairs virus replication in cell culture and neuroinvasion in mice

M. Krautwald, C. Maresch, B. G. Klupp, W. Fuchs and T. C. Mettenleiter

1346–1351

Glycoprotein B switches conformation during murid herpesvirus 4 entry

L. Gillet, S. Colaco and P. G. Stevenson

1352–1363

Latency type-specific distribution of epigenetic marks at the alternative promoters Cp and Qp of Epstein–Barr virus

G. Fejer, A. Koroknai, F. Banati, I. Györy, D. Salamon, H. Wolf, H. H. Niller and J. Minarovits

1364–1370

Safety and immunogenicity of myxoma virus as a new viral vector for small ruminants

B. Pignolet, S. Boullier, J. Gelfi, M. Bozzetti, P. Russo, E. Foulon, G. Meyer, M. Delverdier, G. Foucras and S. Bertagnoli

1371–1379

Human papillomavirus (HPV) genotypes and HPV16 variants in human immunodeficiency virus-positive Italian women

M. L. Tornesello, M. L. Duraturo, P. Giorgi-Rossi, M. Sansone, R. Piccoli, L. Buonaguro and F. M. Buonaguro

1380–1389

Peripheral blood mononuclear cells represent a reservoir of bovine papillomavirus DNA in sarcoid-affected equines

S. Brandt, R. Haralambus, A. Schoster, R. Kirnbauer and C. Stanek

1390–1395

DNA-binding transcription factor NF-1A negatively regulates JC virus multiplication

V. Ravichandran and E. O. Major

1396–1401

Slow cell infection, inefficient primary infection and inability to replicate in the fat body determine the host range of *Thysanoplusia orichalcea nucleopolyhedrovirus*

L. Wang, T. Z. Salem, D. E. Lynn and X.-W. Cheng

1402–1410

Front cover illustration

Coloured electron micrograph of human papillomaviruses (ultrathin section) being shed from a human wart. The width of the brown viral particles is about 55 nm. Image courtesy Klaus Boller, Paul-Ehrlich-Institute, Langen, Germany.

Protein tyrosine phosphatase-H2 from a polydnavirus induces apoptosis of insect cells R. J. Suderman, A. J. Pruijssers and M. R. Strand	1411–1420
---	-----------

ANIMAL RNA

Genomic and biological characterization of aggressive and docile strains of lymphocytic choriomeningitis virus rescued from a plasmid-based reverse-genetics system M. Chen, S. Lan, R. Ou, G. E. Price, H. Jiang, J. C. de la Torre and D. Moskophidis	1421–1433
Expression of novel genes encoded by the paramyxovirus J virus P. J. M. Jack, D. E. Anderson, K. N. Bossart, G. A. Marsh, M. Yu and L.-F. Wang	1434–1441
Viral accessory protein X stimulates the assembly of functional Borna disease virus polymerase complexes M. Poenisch, P. Staeheli and U. Schneider	1442–1445
Complete sequence characterization of isolates of Getah virus (genus <i>Alphavirus</i> , family <i>Togaviridae</i>) from China Y.-g. Zhai, H.-Y. Wang, X.-h. Sun, S.-h. Fu, H.-q. Wang, H. Attoui, Q. Tang and G.-d. Liang	1446–1456
Properties of non-structural protein 1 of Semliki Forest virus and its interference with virus replication K. Kiiver, I. Tagen, E. Žusinaite, N. Tamberg, J. K. Fazakerley and A. Merits	1457–1466
Recombination increases human immunodeficiency virus fitness, but not necessarily diversity N. N. V. Vijay, Vasantika, R. Ajmani, A. S. Perelson and N. M. Dixit	1467–1477
Small ruminant lentivirus proviral sequences from wild ibexes in contact with domestic goats E. Erhouma, F. Guiguen, Y. Chebloune, D. Gauthier, L. M. Lakhal, T. Greenland, J. F. Mornex, C. Leroux and T. Alogninouwa	1478–1484
The flexible C terminus of the rotavirus non-structural protein NSP4 is an important determinant of its biological properties D. Rajasekaran, N. P. Sastri, J. R. Marathahalli, S. S. Indi, K. Pamidimukkala, K. Suguna and C. D. Rao	1485–1496
Induction of host defence responses by <i>Drosophila C</i> virus L. M. Hedges and K. N. Johnson	1497–1501

PLANT

Effects of viral silencing suppressors on tobacco ringspot virus infection in two <i>Nicotiana</i> species S. A. Siddiqui, C. Sarmiento, M. Kiisma, S. Koivumäki, A. Lemmetty, E. Truve and K. Lehto	1502–1508
Purification of viral genome-linked protein VPg from potato virus A-infected plants reveals several post-translationally modified forms of the protein A. Hafrén and K. Mäkinen	1509–1518
Analysis of tobamovirus multiplication in <i>Arabidopsis thaliana</i> mutants defective in <i>TOM2A</i> homologues K. Fujisaki, S. Kobayashi, Y. Tsujimoto, S. Naito and M. Ishikawa	1519–1524

OTHER AGENTS

Cholesterol transporter ATP-binding cassette A1 (ABCA1) is elevated in prion disease and affects PrP ^C and PrP ^{Sc} concentrations in cultured cells R. Kumar, D. McClain, R. Young and G. A. Carlson	1525–1532
---	-----------

Effect of intraventricular infusion of anti-prion protein monoclonal antibodies on disease progression in prion-infected mice C.-H. Song, H. Furuoka, C.-L. Kim, M. Ogino, A. Suzuki, R. Hasebe and M. Horiuchi	1533–1544
Prion propagation in mice lacking central nervous system NF- κ B signalling C. Julius, M. Heikenwalder, P. Schwarz, A. Marcel, M. Karin, M. Prinz, M. Pasparakis and A. Aguzzi	1545–1550

ERRATUM

Molecular epidemiology of the African horse sickness virus S10 gene M. Quan, M. van Vuuren, P. G. Howell, D. Groenewald and A. J. Guthrie	1551
---	------
